

Aviral Gahlot

Consultant

Dynamic and results-driven professional with 8+ years of experience. Implemented proven and celebrated leadership skills to direct development teams through end-to-end project process from initial requirements gathering to vendor management and post-implementation support. Functioned as primary client contact and support across development and implementation stages to efficiently resolve identified risks and ensure consistent alignment with established business objectives and functional requirements.

Work History

**2019-08 -
Current**

Project Manager Team Lead / Scrum Master - Consultant

Globallogic, Noida

- Engaged with clients to define, review, and document project requirements, developing thorough understanding of key business processes and existing systems to inform effective solution development
- Led daily meetings to discuss ongoing sprint work, upcoming tasks, and overall project status against defined milestones, collaboratively identified and resolved risks and other project impediments
- Worked directly with product owners, system engineers, program managers, developers, testers, and customers to define features and technical user stories
- Verified proposed change requests against requirements documentation, performed extensive root cause analysis to justify changes to project scope while communicated with client to discuss additional resource, time, or budgetary support as required
- Handled 15-person development and testing team in Agile environments, functioned as primary conduit and liaison between developers
